BELVEDERE

Belvedere, 4 m octagonal, cover 7910 turquoise, frame RAL 9016 traffic white, with wind roof

Belvedere is probably the fastest parasol in the world. Thanks to the smart Easy-Flap technology, the canopy stretches out in seconds! When closed, it stands upright and takes up minimal space like a central pole parasol – once opened, it transforms into a cantilever parasol with optimal space utilisation and a unique design.

The benefits for you

- Strong aluminium frame ensures longevity
- Easy-Flap system for opening in just a few seconds
- More convenience with stainless steel rotary foot rotatable by 360°
- Unique look and high-grade components

BELVEDERE

Easy-Flap system

Belvedere has an opening mechanism which is unique among parasols. When closed, it takes up as little space as a central pole parasol. When opened, the parasol canopy moves to the side and the Belvedere becomes a practical cantilever parasol.

Stainless steel rotary foot

Sophisticated mechanism: The rotary foot made of stainless steel, rotatable by 360°, is screwed directly onto the ground anchor or the parasol base. The rotating function is conveniently unlocked by pressing on the pedal. When the pedal is released, the mechanism engages and holds the parasol in position.

Belvedere, 4 m octagonal, cover 4017 white, frame RAL 7016 anthracite

High-grade hub

The hubs are the parasol components with the greatest load and are made of solid aluminium. This guarantees high stability and ensures that you can enjoy this shading system for many years. Hubs can be painted with a chosen RAL standard colour to match the frame colour.

Robust pole

Belvedere has an extremely stable 60 x 60 mm mats with 4 mm wall thickness. For square parasols, the pole is delivered in the "left" version as standard. The centre of the parasol is located to the left of the pole. If the pole is to be delivered in the "RIGHT" version, please indicate this when ordering.
